

INTERFLUX® LECTRO LOTION

Handcream with ESD protection

The **Interflux® Lectro Lotion** is a specially formulated handcream for the electronic assemblers. It has a non-greasy formula, which does not contain silicone, lanolin, mineral oil or other materials that would adversely affect the solderability of components and circuit boards. Unlike most handcreams, it also contains no formaldehyde.

The **Interflux® Lectro Lotion** contains Aloe Vera, which promotes healing of burns and chapped skin. It helps to remove sticky rosin and oil picked up during the soldering process. Due to its formulation, **The Interflux® Lectro Lotion** gives also extra **ESD-safe** protection.

*Precious tools
need good care
and
protection !!*

The **Interflux® Lectro Lotion** is available in 236 ml (8 fl. Oz) and 3.78 l (1 gallon) containers with push pump.
